AI-ASSISTED ORDER CREATION

PICO – Your AI Sales Order Copilot

Turn a spoken sentence into a ready-to-review sales order. Conversational GenAI meets your CRM data, with a human always in control.

Voice-first · Next-best-action AI · Human-in-the-loop · CRM-agnostic · Fully voice-controllable

PAIN POINTS WE REMOVE

- **Slow, click-heavy order entry**
  Searching customers and products screen by screen.
- **Repetitive reorders**
  The same baskets typed in again and again.
- **Costly entry errors**
  Wrong product, odd quantity, forgotten items.
- **No hands free in the field**
  Reps on the move or at the customer site.

BENEFITS YOU GET

- **Hyper-productive reps**
  Orders in seconds instead of minutes.
- **Higher order quality**
  Plausibility checks against order history.
- **Upsell on autopilot**
  Smart suggestions based on buying patterns.
- **Trust by design**
  Prices and IDs come from your data, never from the AI.

WORK YOUR WAY

Manual
Classic order entry with live prices

Type
Describe it in plain language

Speak
Dictate in English or German

Listen
PICO reads its answers aloud

WHAT PICO CAN DO

Select customer
Finds the right account by name or number, asks if unsure.

Auto-draft from history
Builds the usual order; uncertain items become suggestions.

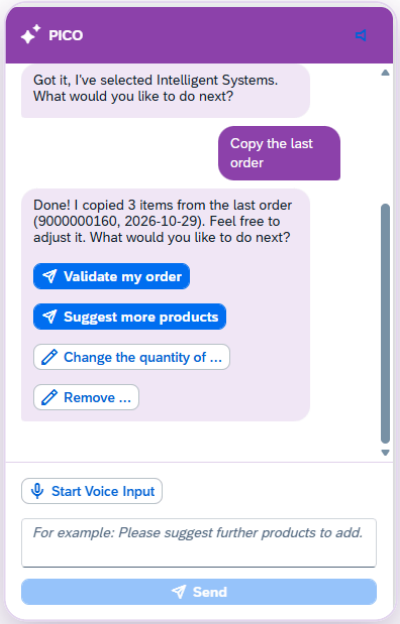

Add, change, remove items
"Make it 10 instead", "remove Product B".

Recommend products
Proposes items the customer is likely to need.

Validate order
Flags unusual products or quantities before you submit.

Copy last order
Starts from the most recent order and adjusts.

Always the logical next step
After every action PICO offers one-click follow-ups (validate, suggest more, change quantity, remove) so you never wonder what to do next.

Real conversation: PICO confirms what it did and proposes the next step as one-click buttons. Voice input and Send are always at hand.

A TYPICAL VOICE INTERACTION: WHAT THE AI DOES, AND WHAT IT DOES NOT

1 · You speak
"Add 5 of Product A and 10 of Product B."
HUMAN

2 · Speech to text
Your voice is transcribed in real time.
AI

3 · Understand intent
AI picks exactly one of six skills, or asks a clarifying question.
AI

4 · Read the request
AI extracts products and quantities and compares them with the live catalog.
AI

5 · Verify & price
IDs checked, prices pulled from CRM master data. No guessing.
NO AI · RULES & DATA

6 · You confirm
Review the draft, then press "Create Order". Nothing is booked automatically.
HUMAN

7 · PICO talks back
The reply is read aloud, word for word. Nothing added.
AI

History-based drafts, recommendations, validation and copy-last-order run on classic business logic and your CRM data, with no AI involved.

Seamlessly integrated with SAP Sales Cloud V1
The showcase reads customers, products, prices and order history live from SAP Sales Cloud V1 and creates the order there. Runs on SAP BTP with enterprise-grade security and AI via SAP Generative AI Hub.

Not on SAP? No problem.
Modular integration layer: we connect PICO to any CRM or ERP via standard APIs. **Next step:** the showcase can be extended into a fully voice-controlled order experience, from first greeting to final confirmation.
